

Children's online safety:

our top 10 e-safety tips will help keep your child safe on the internet

- 1. Don't post any personal information online – like your address, email address or mobile**
- 2. Think carefully before posting pictures or videos of yourself. Once you've put a picture of yourself online most people can see it and may be able to download it, it's not just yours anymore**
- 3. Keep your privacy settings as high as possible**
- 4. Never give out your passwords**
- 5. Don't befriend people you don't know**
- 6. Don't meet up with people you've met online. Speak to your parent or carer about people suggesting you do**
- 7. Remember that not everyone online is who they say they are**
- 8. Think carefully about what you say before you post something online**
- 9. Respect other people's views, even if you don't agree with someone else's views doesn't mean you need to be rude**
- 10. If you see something online that makes you feel uncomfortable, unsafe or worried: leave the website, turn off your computer if you want to and tell a trusted adult immediately.**

We are planning to run free sessions in school for Families, Parents and Carers who want to find out how to make everyone safer online.
